

Vitälzým Testimonials

Following are a few testimonials from healthcare practitioners regarding patients' response to Vitälzým. For additional information please contact World Nutrition at 800.548.2710.

I hurt my back and had tried everything naturally to help the pain but it didn't work. So I went on Naprosyn, a heavy anti-inflammatory. A MRI identified that I had a disk problem. My doctor, a DO, then gave me steroid injections that helped but still left me in pain. During this time, I stayed on Naprosyn. However, this messed up my hormones. I started taking 10 Vitälzým capsules 3 times per day and stopped the injections and anti-inflammatory drugs. I experienced the liver detoxification but was aware of what was going on so I knew it was cleansing my system. After taking it daily, the swelling in my legs has gone down. In addition, I have quit getting up in the night to urinate which means Vitälzým likely helped any kidney scar tissue. And the fungus on my toe is clearing up. I am still taking 5 Vitälzým capsules 3 times per day. "Vitälzým has taken my pain level from a 5 - 6 to a 1."

-- Roxanne Watson, Colonic Hydrotherapist, Escondido, CA

Several months ago, a sample of my blood was analyzed with Dark Field Analysis, and my red blood cells were almost completely 'infested' with target cells. After two weeks of taking 3 capsule of Vitälzým on an empty stomach, morning and night, 95% of the target cells were gone and my red blood cells looked normal and healthy on the Dark Field Analysis screen.

Furthermore, I have had struggles with acne, and the breakouts have left brown and bluish spotted scars. As soon as I began taking Vitälzým, and especially once I increased the dose to 4, 5, 6, 7, and 8 capsules twice per day on an empty stomach, I began to see these scars get lighter and lighter. Some of these marks I couldn't imagine would ever go away... especially this fast.

It seems to me that Vitälzým has seriously enhanced my healing process in both instances – ridding me of the target cells, reducing inflammation, and scarring on my face.

-- Melanie Adinolfi, Nutritionist, Green Valley, AZ

I was diagnosed with breast cancer on May 20th, 2003. I did not use any conventional medicine except for diagnosis. I worked with my naturopath using various supplements to boost my immune system. I used 30 capsules of Vitälzým a day (10 capsules, 3 times a day on an empty stomach) to kill the cancer cells and also to further boost my immune system and help detoxify my body. I also used a variety of other modalities to eliminate the cancer from my system. But Vitälzým was a key component of my protocol. My body was free of cancer by September 2003. And, I remain free of cancer in my body till this day. I do, however, continue to use Vitälzým and other supplements daily and will probably do so for another six months or so.

--Rona Achilles, Ph.D., 2/16/04

Just wanted to say thanks for your product, Vitälzým. I have had many reports of improvements for various complaints from pains, to swelling of joints, to Raynaud's... being relieved by Vitälzým. Two of the most remarkable were in cardiac patients with claudication of their legs besides the angina they had. One was getting ozone treatments with Calcium EDTA chelation and was no longer having pain at rest. All of his major coronary arteries were completely occluded and Mayo clinic had tried laser, robotic therapy, rotorutter,... and for five years running, he had spent over \$10,000 for a month of failed treatments each year. After three weeks of the above chelation therapy he felt better, but paid a price for exertion. After a few days on the Vitälzým, as well as chelation and ozone saunas, he's back hunting, fishing, hiking... with no pain in his chest or legs.

The other fella was as bad... with angina at rest and claudication on 15 feet of walking, he, too, had the calcium EDTA and ozone saunas and was better, but came in today stating the he was able to walk to the grocery store without having to stop once and didn't even feel a tinge of pain or fatigue just two days after starting the Vitälzým.

My hat's off to your company for such a good response...far better than your competitor. I will continue to refer patients to you for their products.

-- Dan O. Harper, MD, Conrad, MT

Dr. Wong, thank you for the data on Vitälzým. I appreciate your expertise. I'm in the process of branching out from "orthodox" medicine at this time, doing acupuncture and osteopathic manipulation. The nutritional elements to patient healing have always been "out there" until now. I appreciate your advocacy of this supplement. It is a breath of fresh air and a useful additional tool in the toolbox of modalities in treating chronic pain in my patients.

-- Thaddeus Srutwa, MD, Grand Haven, MI

I had written to Dr. Wong a few months ago about trying Vitälzým and it took us awhile to decide to try (yet again) another product. So far we are stunned at the change it seems to have made for my older daughter who was misdiagnosed with asthma for 10 years and so developed a lot of scar tissue from chronic severe lung infection. Blessings to you,

--M. K., M.Ac.

"Recently, I listened to a tape on your product, Vitälzým and have been using it for 3 weeks with remarkable results. As a consultant Pharmacist, I would like for you to fax to me ASAP any information about the product. Additionally, I would like to know how I can sell your product to my clients."

-- Dr. Ken Turner, Consultant Pharmacist, Knoxville, TN

I am dropping you this line to tell you how pleased I am with your product - Vitälzým. As a physician for well over 60 years, I have not written a prescription for drugs since 1959! Since that time I have relied on natural substances, such as herbs, nutritional supplements and noninvasive therapies to treat my patients and by so doing I have used and recommended hundreds of supplements in the last 40 years.

Conditions complicated by inflammation and fibrosis are things a physician commonly sees in his practice. For years not much but White Willow Bark and Bromelain were available to treat these maladies with nature. Systemic enzymes have been a blessing in relieving the inflammation that is the cause of every pain and the fibrosis build up that comes with many injuries, diseases and surgery. Of all the systemic enzymes presently on the market, your Vitälzým is one of the best. My patients have found that it works quickly and well to reduce their inflammations and thereby relieve their pain. Fibrotic conditions are likewise greatly reduced or eliminated altogether.

I would like to thank you for bringing this product to the public and wish you continued success in making patients aware of its benefits.

-- Dott. Hermann von-Gehm, Dipl. N.D., Ph.D., P.E., Long Island City, NY

"Last week I received a sample bottle of Vitälzým. I heard about it when you sent me a cassette tape. I hardly ever listen to those, but I was just going on a long drive when it came, and decided to listen on the way. I am an acupuncturist and RN, and have been trying out various enzymes, mostly with very little success. I got my bottle of Vitälzým in the afternoon, and decided to take one before going to bed. When I woke up the next morning, I went down to get my coffee as usual, but I noticed something odd when coming back up the stairs. My knees didn't hurt. Now I don't normally have a lot of knee pain, just what I call old age creeping up. But what made me stop and notice was that I had NO knee pain. I even walked back down and up the stairs just to make sure. I kept taking my enzymes that day, and several times went up and down the stairs just to make sure I wasn't hurting. Now, a few days later, still no knee pain and my chronic low back pain is about half of normal. Can it really be that one pill knocked out my knee pain??? If so, this really is fairy dust. I have several of my patient's trying Vitälzým. Can't wait to see the results!"

-- Connie McKenna, RN and Acupuncturist, Los Osos, CA

I have been on Vitälzým for only 4 days, today being day 5. Already the pain in my R. saddle joint is less. I am experiencing a return of mental clarity and the "word search" (what is that damn word I'm trying to think of). This is not the place nor do I have time to outline my symptoms, that constellation of little annoyances that add up to what I thought of as premature and accelerating way too fast aging. Those things are starting to imperceptibly fade. I just wanted to send you my greetings and most heart-felt thanks.

-- Nancy Adams, Licensed Massage Therapist, Licensed Colonic Therapist

When Vitälzým entered my life, I was suffering from a tenacious virus for about 4 or 5 days. My symptoms were sore throat, cough, hoarse voice, stuffy head, headache, body aches and stuffy nose. I was also recovering from 4 weeks of menstrual bleeding...very disconcerting and weakening and I was depressed by it all. My woman's health care specialist told me by the sounds of my symptoms: the heavy bleeding, and the poochie abdomen etc. that I most likely had fibroid tumors in my uterus causing the symptoms.

I opened Vitälzým bottle and popped 5 caps into my mouth immediately, as I knew that enzymes will eat the protein shield off of viruses and render them helpless if you can get enough of them into your system on an empty stomach. I took 5 more later that day and 5 more before bed. The next morning, I woke up and realized I had slept all night. I also breathed thru my nose, which was something I hadn't done for a few nights and I didn't ache anywhere.

My period started again and I was worried but did not have time to get to the women's health care specialist...it lasted a few days and then stopped. By the end of 2 weeks I had run out of Vitälzým and realized that I had lost 10 pounds and I no longer had a poochie abdomen. I noticed that I was no longer depressed and that I didn't have to take herbs to have a bowel movement...something I had been having to do without fail for the last decade or so. I ordered more Vitälzým immediately.

Since I have been taking Vitälzým I have had no more heavy, saturation bleeding periods. They have been about 5 days with moderate flow instead of 2 - 3 days of barely controllable bleeding night and day, requiring me to stay at home for that time. I have had 4 normal periods in 4 months. The other thing is that they have come on without swelling and pain in my breasts nor migraines for the most part. They happen without 10 days of moodiness and discomfort like before. There has been no breakthrough bleeding and no irregular bleeding in between.

I also had eye pain for over a year prompting me to see an eye doctor who said the muscles around my optic nerves had grown and were causing the visual disturbances known as midlife eyes syndrome-farsightedness etc (I am 53). Very often I was getting terrible headaches and eye pain. That is gone now and I believe it is the result of taking the Vitälzým.

Perhaps related to that is that I have always had achy ears and I frequently wear cotton in them and always a hat. Recently my ears have been very clear and strong. I no longer need cotton nor hats when I am outside which is often as I walk my 2 dogs daily. Another thing I have noticed is that cuts and wounds are healing fast now.

One of the most amazing things is the improvement in my attitude and moods. I just feel happy everyday and I don't have mood swings that exhaust me trying to control them. I can pull out of negativity faster and my thoughts are more expansive and hopeful. I feel peaceful and that I am healing on a deep level.

I also notice that if I take the Vitälzým with any herbs, the herbal effects are exaggerated. I also notice that I urinate way more when I take the Vitälzým and I make sure I drink a lot more water than I ever did before. If I don't, I get a headache which tells me the Vitälzým are detoxing my body on some level...it's subtle.

Before taking the Vitälzým I had swollen and fragile tissue due to misuse of cortisone cream for hemorrhoids years ago. It has always been a bother. The scar tissue and fragile tissue is much improved now-no more swelling and very much nicer.

My dog was so happy to see me recently that he leaped up at the same time I was bending down to hug him. We crashed heads and I tasted blood and saw stars. The dog was ok but my nose felt rearranged and smashed. I remembered the testimonial I read about the woman who crashed her son's head and I took 10 Vitälzým at once. I never did swell up and the pain went away immediately.

I am really so thankful for the Vitalzym and for the info you continue to provide me. I have listened to the tape 12 times now and am still fascinated and I hear something new each time. I love the possibilities of it. Thank you so much!!

-- Marcia K, Nutritional Consultant, Rainier, WA

Your serrapeptase products have literally changed my life and health, and that of many of my patients. I had polio encephalitis at 5 years old, and now have post-polio syndrome. I have hyper vigilance that extends to my entire body (confirmed by EMG). This allows me to feel the actual changes in my body from the enzymes as they happen. I also have prenatal exposure to DES, which causes absorption of water, fat and calcium. I have taken the enzymes for approximately 15 months, and will never stop.

Overnight I lost a size of water weight (I did not understand what was holding the water and fat on my body, it was fibrin!). At three days, I lost the chronic bronchitis I had been fighting for a year. At three months I could feel the bronchi open; at six months I could feel my lungs expand. I had never felt that in my life. At one year I no longer had COPD in spite of a 76% strength diaphragm. At 21 I could no longer sing; I couldn't hold a phrase. At 53, I can now sing although my voice has certainly changed. One of the first things other people noticed was that my voice was more clear and stronger.

My muscle strength had been stable and somewhat improved on Co-enzyme Q10 and increasing doses of L-carnitine. Adding the enzymes improved my digestion to normal and over the fifteen months I have taken the enzymes, my muscles have improved dramatically. I have gotten increased energy, better control of my muscles with less brain fatigue/hitting the wall. As the scar tissue left the muscles, the more recent Achilles tendonitis has almost completely remitted, and the calf muscles stretch. I had bilateral foot drop which has corrected. At this point, I can stand and hold on my toes for at least five minutes. I wore short-leg braces for five years, until a year ago. When I started the enzymes my paraspinal muscles were extremely weak, they had been hypertrophied. The muscles improved slowly, and now are true muscle. Now when I stand, I rest from walking, and before it was an effort to stand upright without dizziness and falling.

My Orthopedist and I believe that the myoneural junction on polio-affected muscles is scarred. I have even more sensation and the nerves are more functional, allowing more motor control. I had lost my righting reflex and fell like a tree. I have regained it and my thermal regulation is improved. I wish I could say the enzymes cured post- polio, but the brain effects remain and there is a time lag between losing old hypertrophied muscle cells/muscle and rebuilding new cells. In the interim, I have had plantar fascias severely, removed six heel spurs on the left and then had the plantar muscles rebuild, increasing stability in the forefoot and ankle.

Overlapping this, the anterior two rotator cuff muscles in my right shoulder stretched, causing pain, and then tightened again. It is an ongoing process, but I have great hope in the continued improvement. The enzymes have allowed me to continue working, although only two hours a day with rest in between.

I love my work, I love getting people well, and my experiences help me diagnose and treat my patients. Thank you so very much.

-- LOUISE HAMILTON, D.C.
